

Aircast A60 Ankle Brace

Description

This is our most lightweight, minimal bulk sports ankle brace as worn by Tennis star Andrew Murray.

The A60 provides a winning combination of effective ankle support and protection. The Aircast A60 Ankle Brace is less bulky than its sister product the Aircast Airsport.

Indications

- Ideal for mild ankle sprains and preventing ankle sprains
- The A 60 is perfect to wear as a preventative reoccurring ankle injury brace during all sports. The slim design works well for rugby, soccer, hockey and tennis as it fits easily into foot wear.
- Suitable for recovery from a sprained ankle, Tarsal Tunnel Syndrome, swollen ankle and following a broken ankle.
- Not indicated for severe ankle instabilities.

How does it work?

Patent pending design incorporates a pair of sleek stabilisers located on either side of the ankle. These stabilisers are moulded at a 60 degree angle to help guard against a sprained ankle and prevent ankle rollover.

Manufactured from Breath-O-Prene® material. The A60 ensures that the wearer stays comfortably cool and dry, while the light-weight design easily fits in athletic footwear without creating additional bulk.

The Aircast A60 is applied and adjusted with a single Velcro strap that securely holds it in place, replacing time-consuming lacing.

The Aircast A60 ankle brace features a specially designed split in the material under the foot; this allows you to move the mesh to one side so you can remove the support before washing.
