

Exoform Wrist Brace by Ossur

Description

This superior wrist brace is very lightweight and has a low profile design. The Exoform Carpal tunnel wrist splint has 20 percent less bulk around the wrist than other wrist splint brace products.

Allowing you to maneuver more without the interference of a brace on your wrist. Specially designed to treat both tendonitis and Carpal Tunnel Syndrome.

Features

- Contoured for an anatomically correct fit
- Lightweight low profile design
- 20% less circumferential bulk than other brands
- More room at base of the thumb, palmar crease and 5th MP for full MP flexion
- Designed to provide smooth, controlled resistance to extreme range of motion
- Pre-shaped into a neutral position for comfortable limited motion/flexibility
- Provides radial and ulnar styloid relief
- "Soft touch" web space is cushioned and 40% thinner than other brands
- Interior is 3-dimensionally molded to enhance comfort

Indications

- Carpal Tunnel Syndrome
- Tendonitis
- Tennis Elbow management
