

DonJoy® Immostrap

The Immostrap back support from Donjoy is a lumbar support with upper and lower compression adjustments segments. The Immostrap is designed with separate upper and lower back compression adjustments straps that enables the user to obtain an anatomical fit. This relates to a brace that is extremely comfortable to wear while it exerts strong compression to alleviate lumbar pain.

When can I use the Immostrap Back Support?

The Immostrap back support can be used for

- acute or subacute lower back pain,
- lumbar arthrosis,
- following disc herniation and
- for lumbar sciatica.
- The back support is suitable for those who lead an active lifestyle, and can be used during heavy duty tasks and leisure activities.
